Publication Support	<p>Attach - Author Confirmation with details of journal and cost.</p> <p>Eligibility - We are acutely aware of the high cost of publishing in some top ranked journals and when pursuing open access options. We also acknowledge the expectation on staff to pursue highly ranked journals given the likely positive impact on University metrics, and pursuing the open access option to maximise equitable availability and impact. While College-based funding of all publication costs is not feasible given the high number of publications each year, we are seeking to establish a limited pool of funding to assist staff with such costs under some circumstances. Applications will be decided by the CMPH Resource Committee on a case by case basis with priority given based on the following criteria:</p> <ul style="list-style-type: none"> ○ SciMago top 10% journals ○ Researchers less than 10 years post PhD completion ○ Researchers with no access to consultancy funds or other discretionary funding
Sponsorship of an event or Conference	Attach - Program (highlighting speakers from Flinders / CMPH).

The CMPH Resource Committee meets fortnightly to discuss these proposals. Your item will be tabled for the first available meeting following submission and you will receive an update/outcome or request-for-more-information within 7 days of the meeting date.
