### **Induction– Explanatory notes for Work Health & Safety Checklist**

The supervisor/manager is responsible for induction of all new staff & Research Higher Degree Students. They must ensure the WHS Induction Checklist is completed and a record maintained.

The University [New Staff Induction](#) in FLO covers generic WHS information including WHS systems, roles and responsibilities and how to report accident / incidents and hazards. It must be completed by all new staff – it does not replace this Local Area Induction Checklist

### **Delegation of Induction Process**

Supervisors can delegate to other staff members responsibility for general aspects of the induction (includes Emergency, First Aid and Security and General WHS information) however the supervisor remains responsible for ensuring that the process is completed.

### **Supervisor's Responsibilities**

Supervisors are responsible for informing new staff, students and others about the local work area and advising of any hazards associated with the area/work/research/ study. This should include identifying any controls that are to be used to allow the work to be undertaken safely.

Risk Assessments and any relevant Safe Work Procedures or safety documentation must also be discussed.

Staff members who have delegated authority to conduct aspects of induction must have the relevant knowledge and technical expertise where necessary.
