How to set up a second device for Multi-factor Authentication

Step 1 – Open Settings in your Flinders account

- Log into your Flinders dashboard.
- Click on your username shown in the top right corner and select Settings.
- Scroll down to the Extra Verification section.
- Click on Setup next to Google Authenticator.

Step 2 - Install the Google Authenticator app on your iPhone or iPad

- Open App Store on your iPhone or iPad
- Search for Google Authenticator.
- Tap GET.
- Open the installed Google Authenticator app.
How to set up a second device for Multi-factor Authentication

Step 3 – Set up through your Flinders dashboard

- Return to your Flinders dashboard.
- Click on **Setup** under the **Google Authenticator** icon.
- In the Choose device type window, choose iPhone and click **Next**.
- A **QR code** will appear on your screen.

Step 4 - Scan the QR code with your iPhone or iPad

- On your iPhone or iPad, open **Google Authenticator**.
- Tap the ‘+’ icon and **scan the QR code**.
- Click the **Next** button and enter the 6-digit code generated by Google Authenticator.
- Click **Verify** to complete the process.

How to Sign in using Google Authenticator

Once the Multi-Factor Authentication feature is enabled, you will be prompted to verify when accessing your Flinders account.

1. **Log in**
   - Go to your [Flinders Dashboard](#), enter your FAN and click Next.
   - Enter your password and click Verify.

2. **Select a method**
   - Select 'Google Authenticator' from the dropdown list.

3. **Verify**
   - Open your Google Authenticator to confirm the unique authentication code. Enter the code in the verification field on your Flinders dashboard.
