

How to setup Authenticator- Edge

Introduction

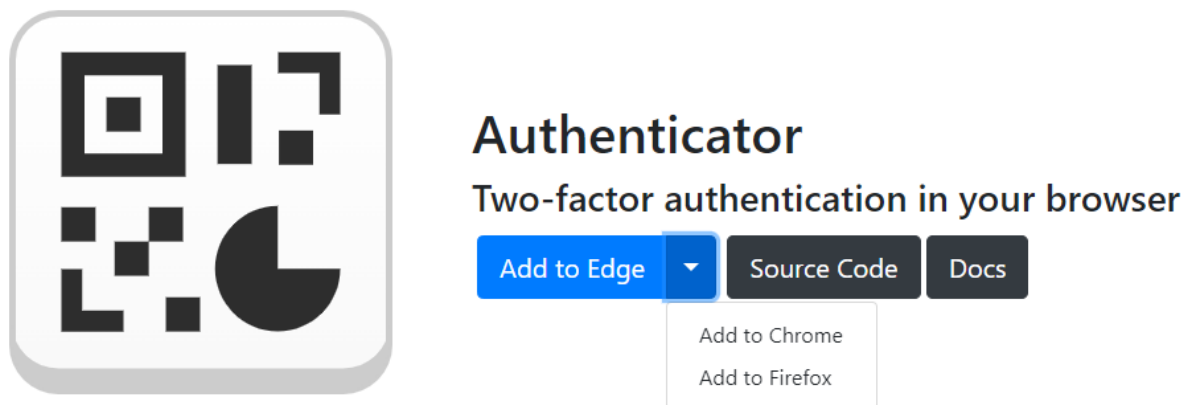

Authenticator ensures that our accounts are protected with multiple layers of security to keep our information safe. Follow this guide to set up Authenticator in your Edge browser.

Pre-requisites:

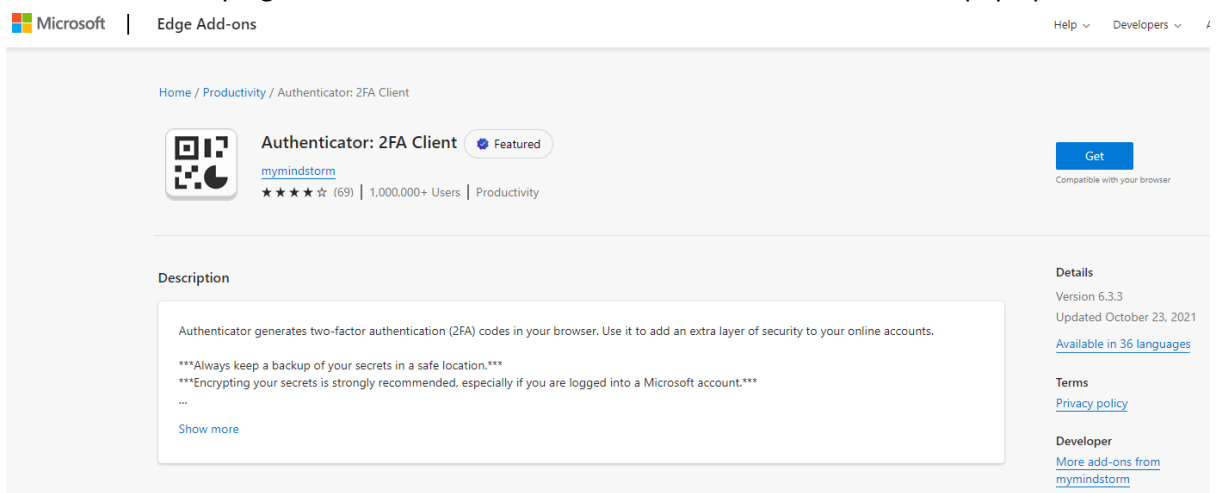

1. Windows desktop or laptop device
2. Internet connection
3. Microsoft Edge Installed

Setup guide:

1. Please use Edge browser to visit: <https://authenticator.cc/>
2. Click “Add to Edge” (the browser being used should be auto detected)

3. Select “Get” on top right corner and click add extension for “Add Authenticator” pop up:

4. Notice of removal from Authenticator which applies to all browsers:

Edge Issues

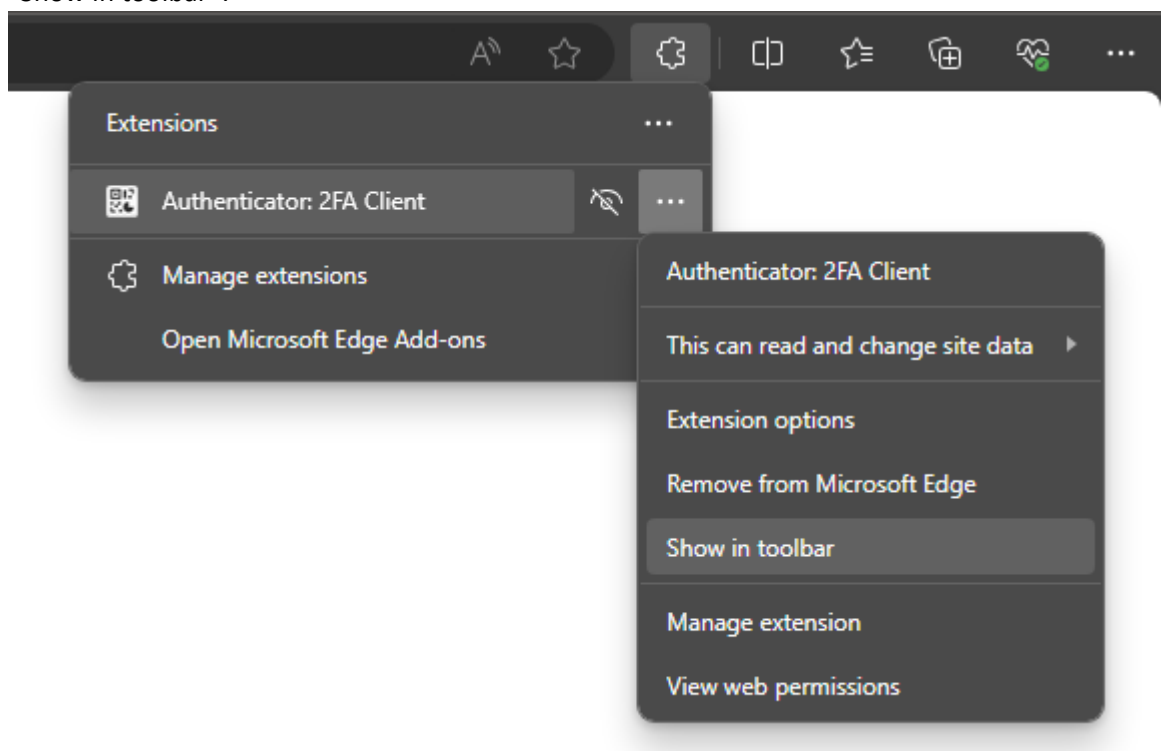

**REINSTALLING AUTHENTICATOR WILL CLEAR YOUR DATA.
NEVER REINSTALL AUTHENTICATOR TO FIX ANY ISSUES**

- Can't remember your password or lost your secrets and don't have a backup? See [Lost Codes](#)
- Want to help translate or have an issue with translation? [Check our Crowdin page](#)
- Have a bug or feature request? [File an issue](#) or [Tweet with @AuthExtension](#)

Translate

Edit

5. Once installed, to make the extension more easily accessible click the jigsaw puzzle icon followed by the three horizontal dots next to the Authenticator extension and select "Show in toolbar":

6. Now login to flinders.okta.com in a new tab and it should now prompt you to setup Google Authenticator:

Set up security methods

Security methods help protect your Okta account by ensuring only you have access.

Set up required

Google Authenticator

Enter a temporary code generated from the Google Authenticator app.

Used for access

Set up →

7. Open up your Authenticator extension again by clicking the jigsaw puzzle and press the QR scanner icon to add an account:

8. Your screen will appear opaque and allow you to drag a selection field over the QR code, **please make sure the coverage area is just the QR code otherwise it will not register correctly:**

Set up Google Authenticator

Scan barcode

Launch Google Authenticator, tap the "+" icon, then select "Scan barcode".

Can't scan?

Next

9. A successful registration will show the notification below:

10. Now when you open your Authenticator extension it should have the Google Authenticator code cycling through. You will need to use this to authenticate when logging into your Flinders account.

11.
